

MOUNTING INSTRUCTION

BABEL Base

BABEL	
Anchor bolts	M22
Length anchor bolts	600 mm

MOUNTING INSTRUCTION

- Position the n°9 anchor bolts respecting the distance of the pole base (see Pic. 2). Use the 2 accessory provided to maintain in vertical position the anchor bolts and facilitate a following mounting of the Babel pole.
- Before mount the pole, place n°2 tubes for drainage and cover them with concrete step (max thickness as per the nuts).
- Placed the pole with the plate in position and adjust its inclination using the 9 nuts up to reach the right position.
- Tighten the nuts and the washers to the anchor bolts using an adjustable wrench of 34mm applying a twisting moment of 280Nm.
- The pole is blocked in position.
